Experts teach us tricks for this season's trendiest metallic make-up

Eyes

Metallic emerald green and peacock blue look fantastic worn either dramatically or subtly around the eyes. A strong sweep of blue or green metallic eyeliner is the easiest way to wear this trend.

Face

Go for an all-over metallic look by burnishing a shimmering powder onto still-damp foundation with a blusher brush. Apply to your cheekbone, down the length of your nose and put a little on your Cupid's bow.

Lips

Pick ultra-shiny berry shades with an almost metallic sheen for your lips. Choose either a solid colour or a sheer formulation that lets your natural lip shade shine through.

Gold looks amazing on the mouth this season. Dot some in the middle of bright red lips or slash a rich, solid bar of it across them.
